Respectfully submitted
GEORGE R WILDES, Treasurer.

We have examined the foregoing account and find it correctly cast and properly vouched.

John P. Willard, H. W. Rogers, Harvey Jewett,

REPORT OF SUPERINTENDENT OF SCHOOLS.

TO THE SCHOOL BOARD OF THE TOWN OF BELMONT:

I submit herein my third annual report as superintendent of schools.

The supervisory district was enlarged in September for the year by the inclusion of Canterbury. This addition was made with the understanding that the Superintendent should obtain the time necessary for this additional work by the use of a secretary in the office, and by the purchase of a motor car. With regard to the results of this action, I may quote from my report made to the various boards, of the work up to the 1st of December.

"I think my expectations regarding the advantage to the district of the admission of Canterbury are justified by the results thus far. I secured a secretary immediately after the supervisory meeting voting to admit the town of Canterbury, and have not only turned over to him an increasing amount of work, and thus saved time for the oversight of the schools, but have been enabled to do many things which could not have been done without assis-It took me some time to choose and purchase an automobile and to secure a license, so that I have had but a single months use of the machine. I find that the car is a great aid to efficiency, practically annihilating distance, and reducing to small proportions the time heretofore spent upon the road. I have made during the term to Dec. 1, 196 visits to the schools. This compares favorably with the record of 148 visits last year for the same period. I have spent this fall 40 3-4 days in visiting schools compared with 34 3-4 days last year. It will be seen, therefore, that I have given practically as much time to the schools of the district as previously organized as I did last year."

I may quote another paragraph of this report as indicating how my time has been spent from the first of Dec. to date.

"My time thus far has been spent entirely in visiting schools and in the business administration of the various school systems, correspondence, purchase of supplies and equipment, etc. I shall plan for the immediate future to spend more time in the office attending to educational matters which have been waiting for some time, including a savings system, first for the Union and Belmont graded schools, and possible later for the rural schools, an outline of studies for the rural schools, designed to record the progress of individual pupils, study of scientific tests for backward children, preparation of tests for various grades and studies, plans for teachers' meetings, preparation of annual reports, etc."

I have prepared for the Supervisory District tables showing a comparison of the districts in various respects, which may prove both interesting and profitable for the citizens of the various districts. The tables are as follows:

	I	II	III	IV
A	verage	Average	Number	Number
Mer	nbership	length	attending	Institutes
	•	of year	high school	attended
Belmont	176	35.50 /	23	3

Referring to these tables, we may note, Table II, that most of the children in the district are able to attend school thirty-six weeks, Northfield and Canterbury alone falling appreciably below this. Table III is taken from the latest report of the State Superintendent for year ending June, 1912. It will be seen that there is a wide variation in the different districts in the proportion of those continuing their course into high school. Table IV shows the number of times that each district has been represented at State Institutes during the two years preceding June, 1912.

Table V is for the current year. It may be noted in addition to these figures that the average salary for the State was, last year, \$41.93. Belmont, it will be seen, pays almost exactly this rate. The amounts under table VII are those assessed by the selectmen under the direction of the school board for text-books and scholar supplies, high school tuition, flags and appurtenances, and other statutory obligations. The small amount expended by Tilton Union District for salaries of school officers, Table VIII, is explained by the fact that the school board of Union District has never accepted any compensation for its services. Table XII, is the most significant of any given. It shows just what effort each district is making by taxing itself to secure good schools. The amounts indicated are the number of dollars paid on each thousand of valuation of the district. It may be noted that even the highest of the rates is not large. Many of the towns in the state are taxing themselves more than double this amount for school purposes. The amounts received from the state, Table XIII, are in accordance with laws passed at various times, and include five items: First, Literary Fund; Second, Superintendent's salary; Third, Amount for average attendance of pupils; Fourth, for qualified teachers; Fifth, High School rebate. Belmont is the only town in the district which is qualified to receive money under each of these heads. The wide variation in the average cost per pupil, Table XVI, will be explained by a comparison of the other tables. The average cost in the two Tilton districts is increased by the payment of debts on the school buildings. Eliminating these items, the average cost per pupil for Tilton Town District would be \$45, for Union, \$31.56.

The schools of Belmont are in excellent condition. We have been fortunate in obtaining the services of teachers whose unusual worth had been proved in the schools of the Supervisory District. The single new teacher is a Normal graduate whose record in the Belmont school has been excellent.

With regard to the proposition which is before the board to maintain next year a grade above the eighth for the benefit of those pupils whose parents prefer that they continue their studies in town, I may say that it seems to me an entirely feasible plan. For them to enter the eighth grade to repeat the work of this year in the hope of merely doing this work more thoroughly, would be a most deadening and discourging process, and one from which no benefit could be derived. For them to return, however, and while carrying on some review, to take up fresh and advanced studies, would be a highly profitable course. I think it will be quite possible with the present teaching force to arrange for an interesting year.

Respectfully submitted,
CHAS. A. BRECK, Supt.

Report of School Board.

With the appropriations the schools have for the most part had 36 weeks. As last year, the scholars from Ladd Hill have been conveyed to the Union as an arrangement satisfactory to the parents of the scholars, but without much saving in expense. Owing to an increase in the rising generation it was necessary to open the Plummer school in the spring which has been in session 32 weeks and we expect there will be need of a school there in the spring. The lower Province Road has been consolidated with the upper Province Road, and we trust may continue. The suit of E. K. Piper for alleged breach of contract has been settled, although we considered the district in no way responsible and to have the best kind of a case, we thought a settlement at \$25 and part costs cheaper than to contest a suit. Owing to a demand from parents and taxpayers it is thought best to extend the school courses a year by review of work already passed and the addition of studies to be selected later.

Those members of the eighth grade who wish to leave school and who are entitled, will be given a certificate of attainment, but there will be no formal graduation this year. For the lack of funds the study of music has been dropped out the past year. We would recommend that this be provided for the coming year.

The increased cost of fuel and the cost of having a man for janitor the year round have increased the running expenses, but the latter item is money well expended, as in the two years that Mr. Brown has had the care of the building not one hour of school has been lost because of cold rooms.

For running expenses we would advise raising \$1400, in place of \$1200 heretofore, as the other items have been cut down \$150.

For the coming year we estimate the following amounts necessary in addition to such sum as the district may vote:

7	. 11 1	0.1 717 57
Money requ	aired by law,	\$1,717.50
66	for text books and supplies,	275.
"	High School tuition,	300.

Our library now has some 2000 books with all the leading magazines. An average circulation of 200 per month. You will notice by the report 78 new books have just been added, also cabinet of Confederate money in all denominations. Open Tuesday, Thursday and Satuaday evenings and Saturday afternoons, and is very much appreciated by the public.

M SARGENT, F K JOHNSON, D W GALE.

We have examined the foregoing accounts and find them correctly cast and properly vouched.
